

Developmental Screening

Sample Workflows

8. MA/team member scrubs charts for children coming in for Well Child Checks. Identifies children ages 0-3 years that are due for an ASQ.

7. MA/provider huddle to plan for patient visits; identify which ASQ is needed for WCCs.

6. MA puts "ASQ - ***" month in appointment notes for those who need it. Places appropriate ASQ at front desk with patient label on it.

5. Front office gives ASQ to parent/guardian at check in with brief explanation.

4. Parent/Guardian fills out form. MA can give assistance as needed.

3. MA rooms patient as per protocol, scores ASQ, enters results in the flowsheets, orders ASQ 96110, and leaves document in exam room for provider to review.

2. Provider reviews results with parent/guardian, decides if intervention is needed, and documents plan of action if needed.

1. If referral to Early Intervention is needed, MA fills out referral form, gets parent/guardian signature, fills out contact info, and faxes form with ASQ to EI program.
