

INJECTABLE AND ONCOLOGY MEDICATIONS ADMINISTERED BY PROVIDER

## Authorization Required List

Not Related to Bleeding and Clotting Disorders

CareOregon Advantage and OHP Members  
Revised 4/01/2025

**INSTRUCTIONS FOR USE:**

1. This list contains **Injectable Medications billed under the Medical Benefit that REQUIRE AUTHORIZATION**. Always search by J-Code **AND** by Drug Name because J-Codes change. **Note:** See Advantage and OHP columns for pertinent information. Prior Authorization Request forms can be found at <http://www.careoregon.org/Providers/ProviderFormsandPolicies.aspx>

2. All medicare advantage home infusion requests require review to determine the appropriate benefit in addition to any authorization requirements.

3. This document should **NOT** be used for: hemophilia/factor/bleeding products OR self-administered drugs (For Medicaid, CareOregon requirements for buy & bill vs specialty pharmacy dispensing will depend on CCO-specific policies).

4. **VACCINES** are NOT included in this document. A separate document on our website provides information regarding vaccine coverage. Common vaccines discussed in that document includes: Zostavax, Shingrix, Gardasil, Pneumovax, and Prevnar

5. If the drug is **NOT** found on this list **AND** will be Buy and Bill (Supplied and billed under the Medical Benefit by the Provider) then it does NOT require authorization.

**EXCEPTION:** New drugs to the market not found on this list. Dump Codes C9399, J3590 and J9999 require Prior Authorization for ANY medication being billed under them whether listed below or not.

6. J3490 (unclassified drugs)- Should only be used for drugs without a more specific code. Auth only required IF drug name is on the list below.

**\*\*Always use the most active code based on date of service and CMS HCPCS codes**

\* Note that ALL codes are subject to change according to CMS HCPCS Codes quarterly updates. CareOregon requires the active code from the date of

± Coverage excluded by Medicare. For member's with dual eligibility, coverage may be offered under their secondary Medicaid (OHP).

¥ DMAP covers when drug is billed through a pharmacy. "Buy and bill" not supported thru CCO. Please submit PA if unusual circumstance prohibit pharmacy dispensing

€ Home Infusion services (CPT and Scodes) also no PA when used with this code

▽ MH/BH (mental health/behaviorial health) only benefit applies to HSO members with physical health (PH) coverage outside of CareOregon. Only services from MH/BH specific providers for MH/BH conditions are eligible. Treatment notification for services groups for MAT and SUD required thru Connect. This auto-approves a variety of eligible CPTs and HCPCS necessary for accurate claim payment. It is not a prior authorization.

**Hemophilia/Factor Products-** Required thru CDRC Hemophilia Center at OHSU.

HCPC Codes include: J7185, J7190, J7191, J7192, J7198, J0365, J7189, J7193, J7194, J7195, J7180, J7205, J7181, J7186, J7187, C9267, J7183, J7200,

Example Product Names (not all inclusive): Humate-P, Factor-III, Benefix, Elocate, Alprolix, Adynovate, Hemlibra, Rebinyn, Esperoct, Fibryga.

### **Intrathecal Compounds**

In accordance with LCA A541000, CareOregon and CareOregon Advantage require use of the HCPC J7999 (compound) for intrathecal pain compounds. If not part of a compound, no PA is required on these drugs.

The following codes should NOT be billed if part of an intrathecal compound:

J0475 and J0476 (baclofen), J0735 (clonidine), J1170 (hydromorphone), J2274 (morphine intrathecal), C9290 (bupivacaine liposomal), J3490 (bupivacaine, and J3010 (fentanyl).

### **Recent PA Removals (PA no longer required)**

Q0138 Feraheme in non-ESRD (effective 2/1/23). PA remains for ESRD dialysis for Feraheme under a different code.

J2315 Vivitrol (effective 1/1/2020), Q5115 Truxima, Q5119 Ruxience, J1454 Akynzeo IV, J9217 Lupron/Eligard (cancer only), Sublocade Q9991/Q9992 and Brixadi J0576 (2/1/24)

### **Brand vs Generics**

Unless otherwise specified by CMS, brand and generic medications share the same HCPCS. For "not therapeutically equivalent" generics, a unique code may be designated by CMS. Correct crosswalking of NDC to the specific HCPCS code will be expected in these situations. Failure to pair correctly could result in claim rejection. Please note, this list is HCPCS code specific. If a HCPCS code is not present for the "not therapeutically equivalent" generic, no PA is required for that product but MAY require PA if the brand is used (if that HCPCS code is present). For example: brand Pempfexy under J9304 requires PA, but none of the "not therapeutically equivalent" generics do (such as J9322 and J9323). Please be sure to accurately check auth requirements by the expected billing HCPCS and NOT only the drug name.

### **ESRD Phosphate Binders- 2025**

**HCPCS:** J0601 (sevelamer carbonate tabs); J0602 (sevalemer carbonate powder); J0603 (sevelamer HCl tabs); J0605 (Velphoro); J0607 (lanthanum carbonate tabs); J0608 (lanthanum carbonate powder); J0609 (Auryxia); J0615 (calcium acetate); J0901 (Vafseo)

As of 1/1/25, CareOregon Advantage (COA) will no longer cover phosphate binders thru a pharmacy (Part D) for members on dialysis. These products will be required to be provided from the dialysis center and billed thru the medical benefit (Part B). All these products will be coverable by CareOregon Advantage without prior authorization.

For CareOregon Medicaid (OHP), coverage is allowable thru either pharmacy or medical billing. However, the medical benefit will require prior authorization for non-preferred products to mirror the pharmacy benefit formulary as shown above. Calcium acetate (J0615) and sevelamer carbonate tablets (J0601) are the only products covered without PA. Members receiving non-preferred products thru the pharmacy benefit currently will be allowed to remain on those products via medical benefit billing, but prior authorization is required in advanced to match the coverage.
