Included Products: Leucovorin calcium tablets

Created: 11/13/2025 Revised: 11/13/2025 Reviewed: 11/13/2025 Updated: 12/01/2025

All Diagnoses			
Initial Criteria: All Diagnoses		If yes	If no
1.	Is the request for an oncology or hematology related condition (such as part of a chemotherapy regimen, graft-versus host-disease, or anemia?)	Approve for life.	Continue to #2
2.	Is the request for cerebral folate deficiency with folate receptor autoantibodies?	Continue to #3.	Do not approve.
3.	Is there documentation confirming a diagnosis of cerebral folate deficiency (CFD) AND folate receptor autoantibodies (FRAAs)? <ul style="list-style-type: none"> - CFD diagnosis typically requires spinal fluid testing that shows 5-methyltetrahydrofolate levels are low in the cerebrospinal fluid while peripheral folate status is normal - Folate receptor autoantibody testing typically requires FRAT testing 	Approve for life.	Do not approve.
